

## PowerMOVE *touch&move* 3.1

### Spreader bars

- 4-point tilting spreader bar
- 2-point spreader bar

### Optional

- Weighing unit

A B C D E

MAXIMUM LIFTING WEIGHT **200 kg**

Safe and comfortable for both patient and caregiver

## Powerful column hoist with long reach and *touch&move* driving support

The **PowerMOVE** is a passive hoist for moving patients safely and comfortably. The mast allows a translational movement of the lifting arm. The patient is, regardless of the height, always lifted at the same distance from the mast, and can therefore be positioned very precisely.

The *touch&move* driving support makes working with the hoist easier and physically less demanding for the caregiver. A gentle push against the push handle is enough to activate the additional wheel under the hoist. This makes it easier to set the hoist in motion and to manoeuvre in small spaces. *touch&move* is a smart solution for tackling physical strain, reducing the risk of physical complaints.

The width of the electrically spreadable legs is easy to adjust in a silent way. The **PowerMOVE** has a four-point electric tilting spreader bar with flexible spacers. Suitable for a wide range of slings with clips. The **PowerMOVE** can also be fitted with a two-point spreader bar for slings with loops and is optionally available with an integrated weighing unit for weighing patients easily on a regular basis.

## Specifications

|                                       |          |                                       |        |
|---------------------------------------|----------|---------------------------------------|--------|
| Highest position lifting arm          | 207 cm   | Maximum total height                  | 212 cm |
| Lowest position lifting arm           | 79 cm    | Maximum width                         | 120 cm |
| Height of the legs                    | 11.5 cm  | Internal width at maximum spread      | 105 cm |
| Space under the legs                  | 6 cm     | Minimum width                         | 70 cm  |
| Reach lifting arm at highest position | 57 cm    | Internal width at minimum spread      | 60 cm  |
| Reach lifting arm at lowest position  | 61.5 cm  | Maximum turning radius                | 155 cm |
| Full length                           | 140.5 cm | Total weight                          | 106 kg |
| Height push handle                    | 120 cm   | Duration of complete lifting movement | 45 sec |
| Minimum total height                  | 188 cm   | Maximum lifting weight                | 200 kg |

\* The **PowerMOVE** hoist is also available with a 2-point spreader bar.
