

GentleMOVE *touch&move* 3.1

Spreader bars

4-point tilting spreader bar
2-point spreader bar

Optional

Weighing unit

A B C D E

MAXIMUM LIFTING WEIGHT **200 kg**

Safe and comfortable for both patient and caregiver

Solid pivot hoist with extra lifting height and *touch&move* driving support

The **GentleMOVE** is a passive hoist for moving patients safely and comfortably. The rotating lifting arm provides extra lifting height, especially when the hoist is driven from the front. In combination with the lengthwise movable spreader bar, the patient can be positioned right at the back of the chair.

The *touch&move* driving support makes working with the hoist easier and physically less demanding for the caregiver. A gentle push against the push handle is enough to activate the additional wheel under the hoist. This makes it easier to set the hoist in motion and to manoeuvre in small spaces. *touch&move* is a smart solution for tackling physical strain, reducing the risk of physical complaints.

The width of the electrically spreadable legs is easy to adjust in a silent way. The **GentleMOVE** has a four-point electric tilting spreader bar with flexible spacers. Suitable for a wide range of slings with clips. The **GentleMOVE** can also be fitted with a two-point spreader bar for slings with loops and is optionally available with a weighing unit for weighing patients easily on a regular basis.

Intuitive touch&move driving support

Specifications

| | | | |
|---------------------------------------|---------|---------------------------------------|----------|
| Highest position lifting arm | 216 cm | Minimum total height | 146 cm |
| Lifting arm height at maximum reach | 145 cm | Maximum total height | 220 cm |
| Lowest position lifting arm | 78 cm | Maximum width | 120 cm |
| Height of the legs | 11.5 cm | Internal width at maximum spread | 105 cm |
| Space under the legs | 6 cm | Minimum width | 70 cm |
| Reach lifting arm at highest position | 38.5 cm | Internal width at minimum spread | 60 cm |
| Reach lifting arm at lowest position | 34 cm | Maximum turning radius | 163.5 cm |
| Maximum reach lifting arm | 66.5 cm | Total weight | 85 kg |
| Full length | 141 cm | Duration of complete lifting movement | 42 sec |
| Height push handle | 120 cm | Maximum lifting weight | 200 kg |

* The GentleMOVE hoist is also available with a 2-point spreader bar.
