

PowerMOVE *Mini touch&move 3.1*

Spreader bars

4-point tilting spreader bar
2-point spreader bar

Optional

Weighing unit

A B C D E

MAXIMUM LIFTING WEIGHT **150 kg**

Safe and comfortable for both patient and caregiver

Compact column hoist with small turning radius and *touch&move* driving support

The **PowerMOVE *Mini*** is a passive hoist for moving patients safely and comfortably. The mast allows a translational movement of the lifting arm. The patient is, regardless of the height, always lifted at the same distance from the mast, and can therefore be positioned very precisely. The **PowerMOVE *Mini*** is very compact, thanks to its short lifting arm and legs. This makes the hoist highly manoeuvrable – Ideal for smaller spaces.

The *touch&move* driving support makes working with the hoist easier and physically less demanding for the caregiver. A gentle push against the push handle is enough to activate the additional wheel under the hoist. This makes it easier to set the hoist in motion and to manoeuvre in small spaces.

touch&move is a smart solution for tackling physical strain, reducing the risk of physical complaints.

The width of the electrically spreadable legs is easy to adjust in a silent way. The **PowerMOVE *Mini*** has a four-point electric tilting spreader bar with flexible spacers. Suitable for a wide range of slings with clips. The **PowerMOVE *Mini*** can also be fitted with a two-point spreader bar for slings with loops and is optionally available with an integrated weighing unit for weighing patients easily on a regular basis.

Intuitive **touch&move** driving support

Specifications

Highest position lifting arm	207 cm	Maximum total height	212 cm
Lowest position lifting arm	78 cm	Maximum width	95 cm
Height of the legs	11.5 cm	Internal width at maximum spread	80 cm
Space under the legs	6 cm	Minimum width	70 cm
Reach lifting arm at highest position	47 cm	Internal width at minimum spread	60 cm
Reach lifting arm at lowest position	51.5 cm	Maximum turning radius	143 cm
Full length	118.5 cm	Total weight	104 kg
Height push handle	120 cm	Duration of complete lifting movement	45 sec
Minimum total height	188 cm	Maximum lifting weight	150 kg

* The **PowerMOVE Mini** hoist is also available with a 2-point spreader bar.
